ABOUT LIVEROOF

Vegetative Roof *Innovators*

A network of industry-leading vegetative roof growers with a collective 500+ years of horticultural experience — local in key markets across North America.

WHO WE ARE

Vegetative Roof Innovators

We are vegetative roof innovators, focused on optimizing every aspect of the vegetative roof. We are a network of industry leading vegetative roof growers with a collective 500+ years of horticultural experience.

We are local in key markets across North America with specialization in regional plant materials, soils, water and climate.

PHOTO

WHO WE WORK WITH

Inclusive & Compatible

We are trying our best to foster a greener world, and one facet of this is creating a certified installer group that is "inclusive" of both roofing-, landscape- and vegetative roof contractors.

Our vegetative roof systems are complementary to nearly all types of waterproofing from all manufacturers — whether EPDM, TPO, PVC, bituminous, polyurethane, rubberized asphalt, inverted, or conventional.

WHAT WE BELIEVE

Greatest Long-Term Value

We believe that to do vegetative roofs right, we must provide the greatest long term owner value — not necessarily the cheapest acquisition price. To us this means ease of maintenance, greatest beauty, longest lifespan, and lowest life cycle cost.

We believe in teamwork and timely, honest communication. We believe in win-win scenarios, fairness, and ethical business

practices. We believe in efficiency, consistency, and great service.

WHAT WE DO

Restoring the Balance

We strive to improve the world by restoring the balance between green spaces and hard spaces. We respect life; the environment, water, air, plants, animals, and humanity.

We develop systems, soils and plants for vegetative roofs in our respective climates, and grow them in a healthy, environmentally responsible manner.

PHOTO

WHY WE DO IT

Because We Care

We care about the earth and its plant, animal, and human inhabitants. And we feel compelled to do our part to help restore the health of the planet and its occupants.

HOW WE DO IT

Tested, Grown & Delivered

We test and develop systems, soils, and plants for vegetative roofs in our respective

climates and grow them in a healthy,
environmentally responsible manner.

We grow in the unique and proven LiveRoof
system, deliver on time, and take pride in
dependable and attentive service.

OUR STORY

Supplier of Hybrid Vegetative Roof Systems & Accessories

LiveRoof is a division of Hortech, Inc., one of the Midwest's leading wholesale growers of sustainably-grown perennials.

Hortech Inc. and its subsidiaries are led by founder **Dave MacKenzie**: horticulturist, biologist, inventor, and author. After achieving national renown as a leader in horticulture, Dave had sufficient experience to re-think and improve vegetative roofs as a key contributor to responsible green building design.

This led to a new company, LiveRoof Global, LLC (in 2006) which quickly became the industry standard for quality.

In addition to developing a more sustainable and better functioning vegetative roof system, we are unique in our local presence through industry-leading nurseries in the United States, Canada, Mexico, and New Zealand. For the LiveRoof system to thrive in all climate types, it has to be tested, produced, and cared for in the climate where it will be installed.

Our products are backed by a network of professional growers which pool together over **500 years of collective experience**, ensuring

HORTECH FACILITY

continual improvement and the highest quality on all projects.

Since the introduction of LiveRoof, our team has introduced complementary systems in response to market demand — including RoofStone engineered pavers, RoofEdge aluminum edge restraint products, PipeRunner irrigation pipe holders, RoofBlue risers, and SolaGreen solar rack systems.

Effective vegetative roof systems must be paired with the most drought tolerant, vigorous and hardy plants. For this reason, we have spent over a decade selecting and developing plants specifically proven to perform on roofs. Our line of **RoofTop Proven™** plants includes dozens of unique varieties that provide the lowest maintenance and the highest performance.
