PATENTED HYBRID DESIGN

The Best of Both Worlds in Green Roofing

LiveRoof offers the natural function and **natural beauty** of built-in-place living roofs — without the extensive ongoing costs of maturation. It's the only system that delivers an instantly mature, fully vegetated green roof.

Unlike conventional mat or carpet systems, LiveRoof modules arrive pre-grown, interconnected, and ready to thrive — eliminating the establishment phase that costs time and money.

WHY LIVEROOF?

Three Pillars of Performance

Our hybrid approach solves the core trade-offs that plague alternative green roof methods.

COLORFUL GREEN ROOF PLANTINGS

Natural Beauty

LiveRoof offers the natural function and beauty of built-in-place living roofs — without the extensive ongoing costs of maturation.

LEARN MORE →

INSTALLATION PHOTO

Ease of Installation

Enjoy the speed and convenience of modular delivery — without grid lines or compartmentalization of soil.

SOLAGREEN SOLAR + GREEN ROOF PHOTO

NEW FOR 2025

Introducing SolaGreen™ — Solar Meets Living Roof

The future of sustainable roofing is here. SolaGreen combines LiveRoof's proven green roof technology with integrated solar panels — delivering dual environmental and energy benefits on a single rooftop footprint.

BLUE-GREEN ROOF RESEARCH

RoofBlue RETAIN™ — Stormwater, Solved

A 2022 study by world-renowned green roof researcher Brad Rowe found that RoofBlue RETAIN — combined with LiveRoof Standard or Lite modules — increases stormwater retention by over 25%.

The same system enhances plant growth and reduces irrigation requirements, making it one of the most impactful upgrades available for any green roof installation.
