Schools & Universities

Single-Family Homes

UNIVERSAL BENEFITS

Benefits that apply to every building and every owner

KEY BENEFIT

Ongoing Cost Savings

Vegetative Roofs provide ongoing financial returns through energy savings, extended roof life, and stormwater compliance.

Transforms Ugly Rooftops

Turn wasted rooftop space into beautiful, usable gardens and amenity areas.

Save Energy

Reduces AC costs by approximately 10–75% during hot weather through natural insulation.

Boost Solar Output

Evaporative cooling from plants makes co-located solar panels 5–15% more efficient.

Increase Revenue

Visible vegetative roofs boost rental rates, increase occupancy, and raise property values. Chicago study: vegetative roof condo units sold for \$69,000 more on average.

Support Healing

Patients with a natural view heal faster and experience less pain.

Attract & Retain Employees

A living roof signals you care about people and the environment, improving recruitment and retention.

Reduce Absenteeism

Exposure to natural views reduces absenteeism and prevents employee burnout.

Increase Productivity

Nature in workplaces yields happier, more productive employees.

Stormwater Compliance

Reduce or eliminate stormwater discharge fees. Filters pollutants before they reach waterways.

Stewardship & Goodwill

Show customers, residents, and neighbors that you care about their future.

Promote Your Cause

Vegetative Roofs can display mascots, logos, or themed plantings that reinforce your brand or mission.

Retrofit for Posterity

Vegetative Roofs work on old and new buildings alike.

Roof Longevity

Extends roof life 2x-3x, turning a 30-year roof into a 90-year roof.

VEGETATIVE ROOF INSTALLATION
